HANDWOVEN WIRE BASKETS

SWEDISH TRADITION SINCE 1922

Korbo handwoven wire baskets are functional and timeless baskets with a history that dates back to the early 1920's Sweden.

In the old days, the baskets were used by fishermen and farmers or anyone who needed reliable carrying and storage that could withstand weather, wind, wear and tear. The design, vision and craftsmanship behind the basket is still as relevant today as it was during that time period.

The photograph opposite is from 1947 and taken in the small fishing village of Skägganäs, located on the east coast of Sweden.

The basket the fishermen are using is the Classic 35.

WOVEN BY HAND FROM A SINGLE WIRE

The manufacturing of the wire baskets started in 1922 in Furufjäll. Since then, the baskets have been woven by hand using the exact same technique.

The unique design with a single handwoven wire, completely without weldings, is the reason why the Korbo baskets are so durable. There are simply no parts of the basket that can fall apart.

The Korbo basket is crafted for life and for generations to come.

TRADITION AND CRAFTSMANSHIP

Behind every basket lies tradition and skilled craftsmanship. All baskets are carefully woven by hand by experienced and proud craftsmen. It takes years to fully master the technique and materials to craft a Korbo basket.

The baskets are individually signed by the craftsman who wove the basket.

MATERIALS

The Korbo baskets are available in four different materials. In addition to the original materials, galvanized steel and acid proof stainless steel, a range of baskets are made in copper and brass.

Acid proof stainless steel has a great resistance to corrosion and is often used in maritime climate. The steel gains its properties through the addition of various alloys and precious metals. The baskets will remain shiny regardless of environmental exposure.

Galvanized steel has effectively been used for more than 150 years. By adding a physical barrier of zinc to the wire, the basket is protected from corrosion and gives it a beautiful matte patina over time.

Copper is a strong, durable and corrosion resistant metal. The surface changes when exposed to the atmosphere and acquires a protective patina that eventually turns to green over an eight to ten-year period.

Brass is a binary alloy composed of copper and zinc and is valued for its workability, corrosion resistance and attractive appearance. Over time a natural tarnish will develop on the surface of the wire giving it a beautiful patina.

CLASSIC SERIES

The Classic 35 was the first model in production in 1922. All other models have been developed from this original design.

The baskets in the Classic series are perfect for all types of storage. Use them for storing magazines, firewood, toys or blankets. Or turn it into an outdoor planter together with the custom sewn Planting Bag.

The baskets in the Classic series are available in six different sizes.

CLASSIC 35 | COPPER

CLASSIC 80 | ACID PROOF STAINLESS STEEL

CLASSIC 35 | BRASS

CLASSIC 80 | ACID PROOF STAINLESS STEEL

CLASSIC 65/24 | LAUNDRY BAG 65 BLACK

BUCKET SERIES

The models in the Bucket series have a foldable handle and are available in three different sizes.

Bring an element of design and functionality into the everyday life.

Use the Korbo Bucket for autumn harvesting, spring gardening or in the daily kitchen activities.

The middle size, straight sided Bucket 20, has been specially designed to fit 15 bottles.

BUCKET 16 | ACID PROOF STAINLESS STEEL

BUCKET 24 | ACID PROOF STAINLESS STEEL

BUCKET 20 | ACID PROOF STAINLESS STEEL

BUCKET 20 | ACID PROOF STAINLESS STEEL

BIN SERIES

The Bin series is characterized by having only one handle.

Use it as a standalone or combine it with the Bin Hanger.

The Bins are easily mounted on the wall, creating a smart and elegant wall mounted storage solution.

The Bin series comes in three sizes.

BIN 18 | BRASS

UMBRELLA BIN | ACID PROOF STAINLESS STEEL

BIN 24 | ACID PROOF STAINLESS STEEL | BIN HANGER WHITE

RECTANGULAR SERIES

The Rectangular series is the latest addition to Korbo's basket collection. The rectangular shape with its straight, yet soft corners provides a functional and beautiful storage basket, utilizing space.

The new design with two submerged handles creates a basket easy to lift and carry. Place it on the hat rack, in the bookshelf, in the linen closet or bring it out in to the garden! The areas of use are endless.

The Rectangular series consists of three sizes.
